

California Regional Water Quality Control Board
Santa Ana Region

November 5, 2004

ITEM: 24

SUBJECT: Draft Interim Remedial Investigation/Feasibility Study and Draft
Interim Remedial Action Plan, County of San Bernardino, Solid
Waste Management Division

DISCUSSION:

In September 2004, the County of San Bernardino submitted a Draft Interim Remedial Investigation/Feasibility Study (DIRI/FS) and Draft Interim Remedial Action Plan (DIRAP) to provide replacement water for City of Rialto Well No. 3. City of Rialto Well No. 3 is being threatened by a perchlorate groundwater plume that is emanating from the County of San Bernardino's property adjacent to the Mid-Valley Sanitary Landfill in Rialto. A 30-day public comment period on the DIRI/FS and the DIRAP was initiated at the Board's September 17, 2004 Board meeting, and was to extend to October 18, 2004. However, the public comment period has been extended to November 17, 2004. Although several public meetings have been held at the County of San Bernardino and the City of Rialto since September 17 in order to accept public comments, the Board will be providing another opportunity today for the public to provide comments on the DIRI/FS and the DIRAP. There will be no formal presentations on this item.
